EDUCATION

Year	Degree/Exam	Institute	CGPA/Marks
2024-2028	Bachelor of Technology (Computer Science and AI)	Newton School of Technology, Rishihood University	7.9/10.0
2023-2024	Intermediate (Class XII)	Kendriya Vidyalaya	8.6/10.0
2021-2022	Matriculation (Class X)	Kendriya Vidyalaya	8.5/10.0

INTERNSHIPS

AI Intern June 2026 - August 2026
Study2Win Pvt. Ltd. (studyzone365) *Faridabad*

- **Engineered** 5 n8n pipelines with Meta and LinkedIn APIs, automating 90% of social media workflows, including topic discovery, content generation, post scheduling, and multi-channel publishing across Facebook, Instagram, and LinkedIn.
- **Streamlined** 70% of lead-generation workflows using n8n, Python, and WhatsApp Business API to enable AI-driven outreach, automated lead qualification, multi-step follow-up sequences, and real-time data synchronization with centralized Google Sheets.
- **Developed** 2 AI voice agents using Retell AI and ElevenLabs, automating 50% of recruitment-call workflows through real-time voice interactions, initial candidate screening, personalized counselling outreach, and end-to-end interview scheduling.

AI/UI Engineer July 2025 - August 2025
Rashtram AI *Sonipat*

- **Architected 100% of the frontend web platform from scratch** using **Next.js and React**, designing end-to-end responsive UI modules and interactive dashboards across all core AI product workflows.
- **Engineered 100% of user authentication and REST API integrations**, building secure login flows and automated data ingestion pipelines to standardize payload delivery into core **AI models**.
- **Optimized backend microservices and LLM workflows** in collaboration with backend engineers to streamline end-to-end data flow, enhance model performance, improve response quality, and reduce system latency.

PROJECTS

Diabetes Detection Agent (Agentic AI + RAG System) (Github) (Demo) April 2026

- Designed a **two-stage ML pipeline** combining **Linear Regression** and **Decision Tree** models trained on **24 clinical parameters** to calculate a **0–100 diabetes risk score** and generate a diagnostic label for more granular risk assessment.
- Built an **Agentic RAG pipeline** using **LangGraph** for agent orchestration, **ChromaDB** for vector storage, and **HuggingFace MiniLM embeddings** to generate context-aware health reports grounded in **WHO and ICMR clinical guidelines**.
- Developed and deployed a **Streamlit web application** featuring a **glassmorphism UI**, **automated PDF health reports**, and a **conversational chatbot** for follow-up queries on **Streamlit Cloud**.

Kudos To Code (Github) (Demo) November 2025

- Identified gaps in developer portfolios and built **Kudos To Code**, unifying **GitHub activity, projects, and competitive programming stats** from **LeetCode and Codeforces** into one shareable link for a **comprehensive developer profile**.
- Developed a **full-stack web application** using **Next.js 16, React 19, Tailwind CSS v4, Framer Motion, Radix UI, Node.js, Express.js v5, MongoDB, JWT, and BcryptJS** for **secure, scalable, and efficient data handling**.
- Enabled developers to showcase **coding achievements, programming statistics, and project highlights** through a **professional online profile**, improving visibility during **placements and job applications** to attract potential recruiters.

SKILLS

- **Artificial Inteligence:** AI digital tool for business, Analytics, Python, Deep Learning (DL), Deep Network Training Techniques, Generative AI, Transformers & Generative Models, Scikit-learn, LangChain, LangGraph, LangSmith, Natural Language Processing, Natural Language Toolkit (NLTK), LLM Jailbreaking, LLM, Model Training
- **Dev:** Next.js, AWS, API, API testing, C++, C, Claude Code, Computer Networks, Git and Github

RELEVANT COURSEWORK

- **Data Structures & Algorithms:** Solved complex problems using efficient algorithms and optimized time-space complexity.
- **Generative AI:** Built LLM applications using RAG, prompt engineering, embeddings, and FAISS vector search.
- **Machine Learning:** Optimized Scikit-learn models through feature engineering, cross-validation, and hyperparameter tuning.
- **Deep Learning:** Developed TensorFlow neural networks using CNNs, adaptive optimizers, and regularization techniques.

ACHIEVEMENTS

- Secured National **Rank 1,067 in ICPC 2025**, solving complex algorithmic problems under strict competitive constraints.
- Completed **2 Hacktoberfest editions**, contributing open-source code, bug fixes, and pull requests across collaborative repositories.
- **Solved 1,200+ competitive programming** problems across **LeetCode (~890)**, **Codeforces (~300)**, and **CodeChef (~120)**, achieving **Knight Rank (1863 rating)** on LeetCode and Pupil Rank on Codeforces.

EXTRA-CURRICULAR ACTIVITIES

- Participated in the **Amazon ML Challenge** and **AI Harness Hackathon**, exploring **AI/ML solutions**.
- Actively participated in competitive programming contests on **LeetCode, Codeforces, and CodeChef**.
- Completed **Hacktoberfest twice**, contributing to open-source projects.
